International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1–2

Special Issue on 'Unstructured Mesh Generation'

Guest Editors: Scott A. Canann, Sunil Saigal and Steven J. Owen

EDITORIAL 1

Multi-block mesh extrusion driven by a globally elliptic system: J. C. Vassberg 3

Generating a mixed mesh of hexahedra, pentahedra and tetrahedra from an underlying tetrahedral mesh: S. Meshkat and D. Talmor 17

Surface remeshing by local hermite diffuse interpolation: A. Rassineux, P. Villon, J.-M. Savignat and O. Stab 31

Boundary-sensitive mesh generation using an offsetting technique: J. Krause, N. Strecker and W. Fichtner 51

Biting: advancing front meets sphere packing: X.-Y. Li, S.-H. Teng and A Üngör . . . 61

Automated generation of FEA models through idealization operators: L. Fine, I. Remondini and J.-C. Leon 83

Local optimization-based simplicial mesh untangling and improvement: L. A. Freitag and P. Plassmann 109

Automatic scheme selection for toolkit hex meshing: D. R. White and T. J. Tautges . . 127

Hybrid grid generation for turbomachinery and aerospace applications: A. Khawaja and Y. Kallinderis 145

Triangulation of arbitrary polyhedra to support automatic mesh generators: B. Kaan Karamete, M. W. Beall and M. S. Shephard 167

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Anbar), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematic Abstracts.

Boundary layer mesh generation for viscous flow simulations: R. V. Garimella and M. S. Shephard 193

Generation of non-isotropic unstructured grids via directional enrichment: R. Löhner and J. Cebral 219

Parametric surface meshing using a combined advancing-front generalized Delaunay approach: H. Borouchaki, P. Laug and P.-L. George 233

Automated hexahedral mesh generation by generalized multiple source to multiple target sweeping: M. Lai, S. Benzley and D. White 261

Interval assignment for volumes with holes: J. Shepherd, S. Benzley and S. Mitchell . 277

H-Morph: an indirect approach to advancing front hex meshing: S. J. Owen and S. Saigal 289

Adaptation of CAD surface meshes to a map of sizes through the IGATOMM concept: F. Noël 313

Hexahedral meshing of non-linear volumes using Voronoi faces and edges: A. Sheffer and M. Bercovier 329

AUTHOR INDEX 353

KEY WORD INDEX 354

Issue No. 3

Two refined non-conforming quadrilateral flat shell elements: Y. X. Zhang, Y. K. Cheung and W. J. Chen 355

Inelastic transient dynamic analysis of Reissner–Mindlin plates by the D/BEM: C. P. Providakis and D. E. Beskos. 383

A residual-based finite element method for the Helmholtz equation: A. A. Oberai and P. M. Pinsky 399

Coupling temperature to a double-porosity model of deformable porous media: I. Masters, W. K. S. Pao and R. W. Lewis 421

Global-basis two-level method for indefinite systems. Part 1: convergence studies: J. Fish and Y. Qu 439

Global-basis two-level method for indefinite systems. Part 2: computational issues: Y. Qu and J. Fish 461

ANNOUNCEMENT. 479

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 8 480

Issue No. 4

The boundary element solution of the Cauchy steady heat conduction problem in an anisotropic medium: N. S. Mera, L. Elliott, D. B. Ingham and D. Lesnic 481

Numerical solution of the variation boundary integral equation for inverse problems: R. Gallego and J. Suárez 501

Imposing essential boundary conditions in the natural element method by means of density-scaled α-shapes: E. Cueto, M. Doblaré and L. Gracia 519

Coarse mesh evolution strategies in the Galerkin multigrid method with adaptive remeshing for geometrically non-linear problems: Y. T. Feng and D. Perić 547

A field-based finite element method for magnetostatics derived from an error minimization approach: P. Alotto and I. Perugia 573

Issue No. 5

Conservation properties of a time FE method. Part 1: time-stepping schemes for *N*-body problems: P. Betsch and P. Steinmann 599

Parallel finite element method to solve the 3D Poisson equation and its application to abrupt heterojunction bipolar transistors: A. J. Garcia-Loureiro, T. F. Pena, J. M. Lopez-Gonzalez and L. Prat 639

One-dimensional analysis of thin-walled closed beams having general cross-sections: J. H. Kim and Y. Y. Kim 653

Transient pressure solution for a horizontal well in a petroleum reservoir by boundary integral methods: L. Farina, Y. Ding and T. Ha-Duong 669

Large-eddy simulation of separated leading-edge flow in general co-ordinates: Z. Yang and P. R. Voke 681

The ALE-method with triangular elements: direct convection of integration point values: M. J. van Haaren, H. C. Stoker, A. H. van den Boogaard and J. Huétink . . . 697

ANNOUNCEMENT 721

Issue No. 6

Mixed-dimensional coupling in finite element models: R. W. McCune, C. G. Armstrong and D. J. Robinson 725

Iterative algorithms for impressed cathodic protection systems: W. Sun, G. Yuan and Y. Ren 751

On strong discontinuities in anelastic solids. A finite element approach taking a frame indifferent gradient of the discontinuous displacements: C. C. Celigoj 769

Load increment procedure for post-buckling analysis of laminated plates under in-plane loads by finite strip method: S. S. E. Lam and G. P. Zou 797

Dispersion analysis and element-free Galerkin solutions of second- and fourth-order gradient-enhanced damage models: H. Askes, J. Pamin and R. de Borst 811

Time discontinuous linear traction approximation in time-domain BEM: 2-D elasto-dynamics: J. A. M. Carrer and W. J. Mansur 833

ANNOUNCEMENT 849

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 9 . . . 850

Issue No. 7

Riemann solvers for water hammer simulations by Godunov method: V. Guinot . . . 851

A direct approach for boundary integral equations with high-order singularities: A. Frangi and M. Guiggiani 871

Design of large-deformation steady elastoplastic manufacturing processes. Part I: a displacement-based reference frame formulation: D. Balagangadhar and D. A. Tortorelli 899

Design of large-deformation steady elastoplastic manufacturing processes. Part II: sensitivity analysis and optimization: D. Balagangadhar and D. A. Tortorelli 933

Infinite elements for wave problems: a review of current formulations and an assessment of accuracy: R. J. Astley 951

Issue No. 8

Contact with friction between beams in 3-D space: G. Zavarise and P. Wriggers . . . 977

Reanalysis-based optimal design of trusses: L.-J. Leu and C.-W. Huang 1007

A highly efficient enhanced assumed strain physically stabilized hexahedral element: M. A. Puso 1029

A four-node, shear-deformable shell element developed via explicit Kirchhoff constraints: J. Liu, H. R. Riggs and A. Tessler 1065

Adaptive finite element analysis of mixed-mode crack problems with automatic mesh generator: K. S. R. K. Murthy and M. Mukhopadhyay 1087

Issue No. 9

A fully coupled fine element analysis of water table fluctuation and land deformation in partially saturated soils due to surface loading: J.-M. Kim 1101

Extension of the "Solid Shell" Concept for Application to Large Elastic and Large Elastoplastic Deformations: R. Hauptmann, K. Schweizerhof and S. Doll 1121

An algorithm to solve coupled 2D rolling contact problems: J. A. Gonzalez and R. Abascal 1143

Statistical model of strongly anisotropic rough surfaces for finite element contact analysis: R. Buczkowski and M. Kleiber 1169

An implicit finite element material model for energetic particulate composite materials: R. M. Hackett and J. G. Bennett 1191

Spectral equivalence and proper clusters for matrices from the boundary element method: E. E. Tyrtyshnikov and R. H. Chan 1211

ANNOUNCEMENT 1225

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 10 . . . 1226

Issue No. 10

Finite elements with embedded displacement discontinuity: a generalized variable formulation: G. Bolzon and A. Corigliano 1227

A subspace iteration algorithm for the eigensolution of large structures subject to non-classical viscous damping: T. Gmur and A. Schorderet 1267

Finite element model of interdiffusion and reaction in polydisperse polymer blends: E. Pardo, J. P. Tomba and J. M. Carella 1281

Variational integrators and the Newmark Algorithm for conservative and dissipative mechanical systems: C. Kane, J. E. Marsden, M. Ortiz and M. West 1295

Efficient unstructured quadrilateral mesh generation: J. Sarrate and A. Huerta 1327

ANNOUNCEMENT 1351

Issue No. 11

The multiblock method. A new strategy based on domain decomposition for the solution of wave propagation problems: F. J. Serón and F. J. Sabadell 1353

Penalty function method for combined finite-discrete element systems comprising large number of separate bodies: A. Munjiza and K. R. F. Andrews 1377

Weighting parameters for time-step integration algorithms with predetermined coefficients: T. C. Fung 1397

A versatile load balancing framework for parallel applications based on domain decomposition: F. J. Lingen 1431

A solution via generalised integral transform technique for the simultaneous transport processes during combustion of wood cylinders: E. N. Macêdo, R. M. Cotta and H. R. B. Orlande 1455

Issue No. 12

On a two-level Newton-type procedure applied for solving non-linear elasticity problems: O. Axelsson and A. Padiy 1479

Detonation gas model for combined finite-discrete element simulation of fracture and fragmentation: A. Munjiza, J. P. Latham and K. R. F. Andrews 1495

Conservation of energy for schemes applied to the propagation of shallow-water inertia-gravity waves in regions with varying depth: T. O. Espelid, J. Berntsen and K. Barthel 1521

Gradient-enhanced damage modelling of high-cycle fatigue: R. H. J. Peerlings, W. A. M. Brekelmans, R. de Borst and M. G. D. Geers 1547

Shape optimal design of structures: an efficient shape representation concept: M. Kegl 1571

ANNOUNCEMENT 1589
